## EXPERIENCE

**General Assembly**                                                                                      Boston, MA
*Software Engineering Fellow*                                                          *July 2019 – October 2019*
- Completed a 12-week, 480+ hour software engineering career accelerator program
- Created full-stack applications with RESTful APIs using MVC frameworks
- **Featured Project:** *À LA MODE* dnnyp.github.io/shop-scrape-app-client
  A reporting tool that scrapes product data from fashion e-commerce sites and generates interactive web and CSV reports
  Built using React.js, React Bootstrap, react-bootstrap-table-2, Express.js, MongoDB, Node Osmosis
- **Featured Project:** *What the DUCK?!* team-duck.github.io/frontend-duck
  A team-built survey application that allows users to create and respond to surveys and view results graphically
  Built using Handlebars.js, jQuery, Bootstrap, SASS, CanvasJS, Express.js, MongoDB, Socket.IO
- **Featured Project:** *Fantasy Feedback* dnnyp.github.io/full-stack-project-client
  A fantasy football rating app that lets users create their own fantasy rosters and leave comments and ratings on others' rosters
  Built using Handlebars.js, jQuery, Bootstrap, SASS, Bootstrap Table, Ruby on Rails, PostreSQL
- **Featured Project:** *Tic-Tac-Toe* dnnyp.github.io/game-project-client
  Responsive web game with a JavaScript/Bootstrap front-end built from scratch and leveraging a third-party Rails API

**State Street Corporation**                                                                              Boston, MA
*Project Analyst, Senior Associate*                                                        *June 2016 – July 2019*
- Functioned as primary business analyst and product owner for the confirmation matching application
- Managed the development life-cycle of the new ION ARC reporting application
- Documented the requirements for the new ION D&C back office module by meeting with global stakeholders
- Launched 2 Silver Certified Agile teams and facilitated their transitions from Scrum to Kanban

**UMASS Center for Multicultural Advancement and Student Success**                          Amherst, MA
*Webmaster*                                                                          *September 2013 - May 2016*
- Created event profiles on Campus Pulse application and managed the CMASS website
- Managed CMASS social media channels (Facebook, Twitter, and Instagram)
- Designed promotional materials for campus events

**State Street Corporation**                                                                              Boston, MA
*Intern*                                                                              *June 2011 - August 2015*
- Monitored the delivery of time-critical data extracts to State Street clients
- Fulfilled ad hoc client requests for additional fund data extracts; created client sample files and data-mart access profiles
- Tested UNIX shell scripts and documented results
